PROFESSIONAL SUMMARY

Computer Science & Engineering student (B.Tech, expected 2027) who builds full-stack web applications with React.js, Node.js, Express.js and MySQL, with client work in Next.js, NestJS, Prisma and PostgreSQL. Also experienced in computer vision using Python, OpenCV and MediaPipe. Solid grounding in Data Structures & Algorithms, DBMS and the SDLC. Seeking a software engineering internship or entry-level role to build reliable, user-centric software.

TECHNICAL SKILLS

Programming Languages: C, C++, Python, JavaScript (ES6+), SQL

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, NestJS, Prisma, OpenCV, MediaPipe, NumPy

Web Technologies: HTML5, CSS3, REST APIs, Vite

Databases: MySQL, PostgreSQL

Tools & Platforms: Git, GitHub, VS Code, Cursor, Antigravity, Postman

Core Concepts: Data Structures & Algorithms, DBMS, Operating Systems, Software Engineering (SDLC)

PROJECTS

OptiFi — Financial Operations & Remittance Management SaaS *Ongoing | Client Project*

Tech Stack: Next.js 14, NestJS, Prisma, PostgreSQL

- Developing a centralized SaaS platform for daily accounting, remittance tracking and real-time monitoring of financial operations.
- Designing role-based access control for Super Admins and Operators, including workforce management and operator activity/status visibility.
- Building daily cash-flow workflows covering opening balances, collections, expenses, standard transfers and Nepal transfers.
- Implementing reconciliation alerts for pending debits, unresolved credits and operator inactivity.

Air Canvas — Computer Vision & Hand-Gesture Interactive System *Ongoing | Final Year College Project*

Tech Stack: Python, OpenCV, MediaPipe, NumPy, GenAI

- Built a webcam-based gesture-recognition canvas for touchless drawing using OpenCV and MediaPipe hand-landmark detection.
- Implemented finger-position-based colour selection, brush-size adjustment and canvas clearing with an on-video UI overlay.
- Exploring GenAI-assisted prompt generation to convert hand-drawn gesture sketches into refined digital graphics.

Café Maverick & Café Relish — Premium Café Website Prototypes *Completed | Client Project*

Tech Stack: React, Vite, JavaScript, CSS

- Built frontend website prototypes for two cafés featuring cinematic backgrounds, café branding and a modern black-and-gold visual theme.
- Developed a home page, an interactive food menu with category-based price cards, an About section and a photo gallery.
- Added contact information, location details, Google Maps integration and responsive layouts for mobile and desktop.

Crowdsourced Civic Issue Reporting & Resolution System *Completed | SIH 2025-26 Project*

Tech Stack: React.js, Node.js, Express.js, MySQL, REST APIs

- Built a full-stack platform that lets citizens report municipal issues such as potholes, sanitation and streetlight problems, with status tracking.
- Developed REST API workflows for issue submission, priority categorization, media uploads and administrative review; modelled complaints and status updates in a relational MySQL schema.

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science & Engineering *Expected Graduation: 2027*

Ashokrao Mane Group of Institutions (BATU), Maharashtra

ADDITIONAL INFORMATION

Core Strengths: Problem Solving, Analytical & Logical Reasoning, SDLC & Testing, Team Collaboration, Adaptability

Areas of Interest: Full-Stack Web Development, Applied AI / Computer Vision, Software Quality Assurance, Data Structures

Languages: English, Hindi, Marathi
